

Secure your future by migrating VMware workloads to Azure

Cloud adoption is accelerating, by 2024, 70% of workloads will be on the cloud¹

Whether it's concerns about security threats, the need for software and hardware updates, limited budgets and resources, or managing end-of-life support, Azure offers an on-demand infrastructure, and elastic scalability, that delivers a superior total cost of ownership, enhanced flexibility, and a fertile environment for fostering innovation.

Your organization today

- Existing VMware on-prem environment
- Existing VMware skillsets
- Existing VMware licenses

Cloud benefits

- Save with consumption-based licensing
- Stop overprovisioning hardware
- Gain business and IT agility
- Access global scale and elasticity
- Increase security and resiliency
- Use hybrid cloud options, if needed

Choose your migration path

Modernize your VMware workloads with native Azure IaaS or PaaS services and take advantage of many cloud benefits and existing licenses. Alternatively, join the many organizations that found the fastest path to the cloud is migrating VMware workloads "as is" with Azure VMware Solution. Choose one or both; either option takes advantage of Azure's management, security, and compliance services.

Azure VMware Solution

Migrate VMware "as is"

- Retain VMware skills, familiar tooling
- Migrate quickly/datacenter exit, no application modifications required
- Use VMware technology stack on Azure for symmetry with on-premises
- VMware subscription licenses included, no on-prem license required

Azure IaaS and PaaS

Modernize to native Azure

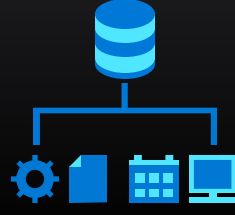

- Leverage Azure and cloud skills
- Modernize with flexible IaaS and PaaS services
- Shift to Azure compute, storage, and networking infrastructure
- No VMware licenses required

← Azure management and security services →

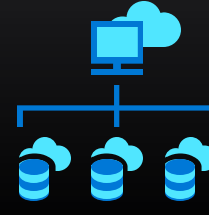

Increase productivity with elasticity, scale, and fast provisioning cycles by migrating your VMware workloads to Azure

Built-in continuity, speed and scale with modern infrastructure

Leverage existing VMware skills and tools

Seamlessly modernize apps overtime with Azure

Unmatched cost savings for Microsoft customers

← Accelerate, Modernize, Simplify →

Migrate your VMware to Azure and enable:

Speed and simplification of migration/hybrid cloud

87% faster deployment, new compute/storage²

Application modernization, development, and testing

46% faster delivery of new applications²

Datacenter expansion, reduction, or retirement

16% lower infrastructure cost, avoiding 400+ servers²

Disaster recovery and business continuity

86% less unplanned downtime²
